Foresight Education is “a philosophy, not a specified curriculum design.” **Foresight Education** provides free access to instructional resources, teacher training and support, and programs to meet its mission -- “to provide an increasingly futures-oriented and academically prepared cadre of students.” A number of domestic and international school programs have participated in one or more programs of **Foresight Education** as of 2014.

The [Curriculum Guide](#), the first item on the Educators list, contains --

- An explanation and rationale for teaching foresight (Sections I, II, III)
- Foresight tools and goals/learning objectives (IV, V)
- Pedagogical foundation/approach (VI)
- Curriculum (VII)
- Evaluation (VIII)
- Appendix A: 11 Learning Objectives, Assessments, Activities, Teacher activities/instructions
- Appendix B: Assessments
- Appendix C: Badges

At the bottom of the page cross-links access Resources, Badges, Curriculum Guide, Grants, Assessments, and Examples.
